EDUCATION
IN 2050

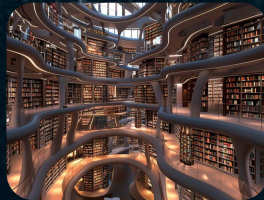

SCHOOLS

Children, 8-18 years old join spaceship schools in which they learn more about technology and cosmos. Lessons are given by top scientists and engineers of the world

UNIVERSITIES

Students will study at different universities throughout the universe, maybe on a different planet, maybe on a space station deep in space. Universities will be available for all ages, after they finish they pass the final school exam.

INTERNSHIPS

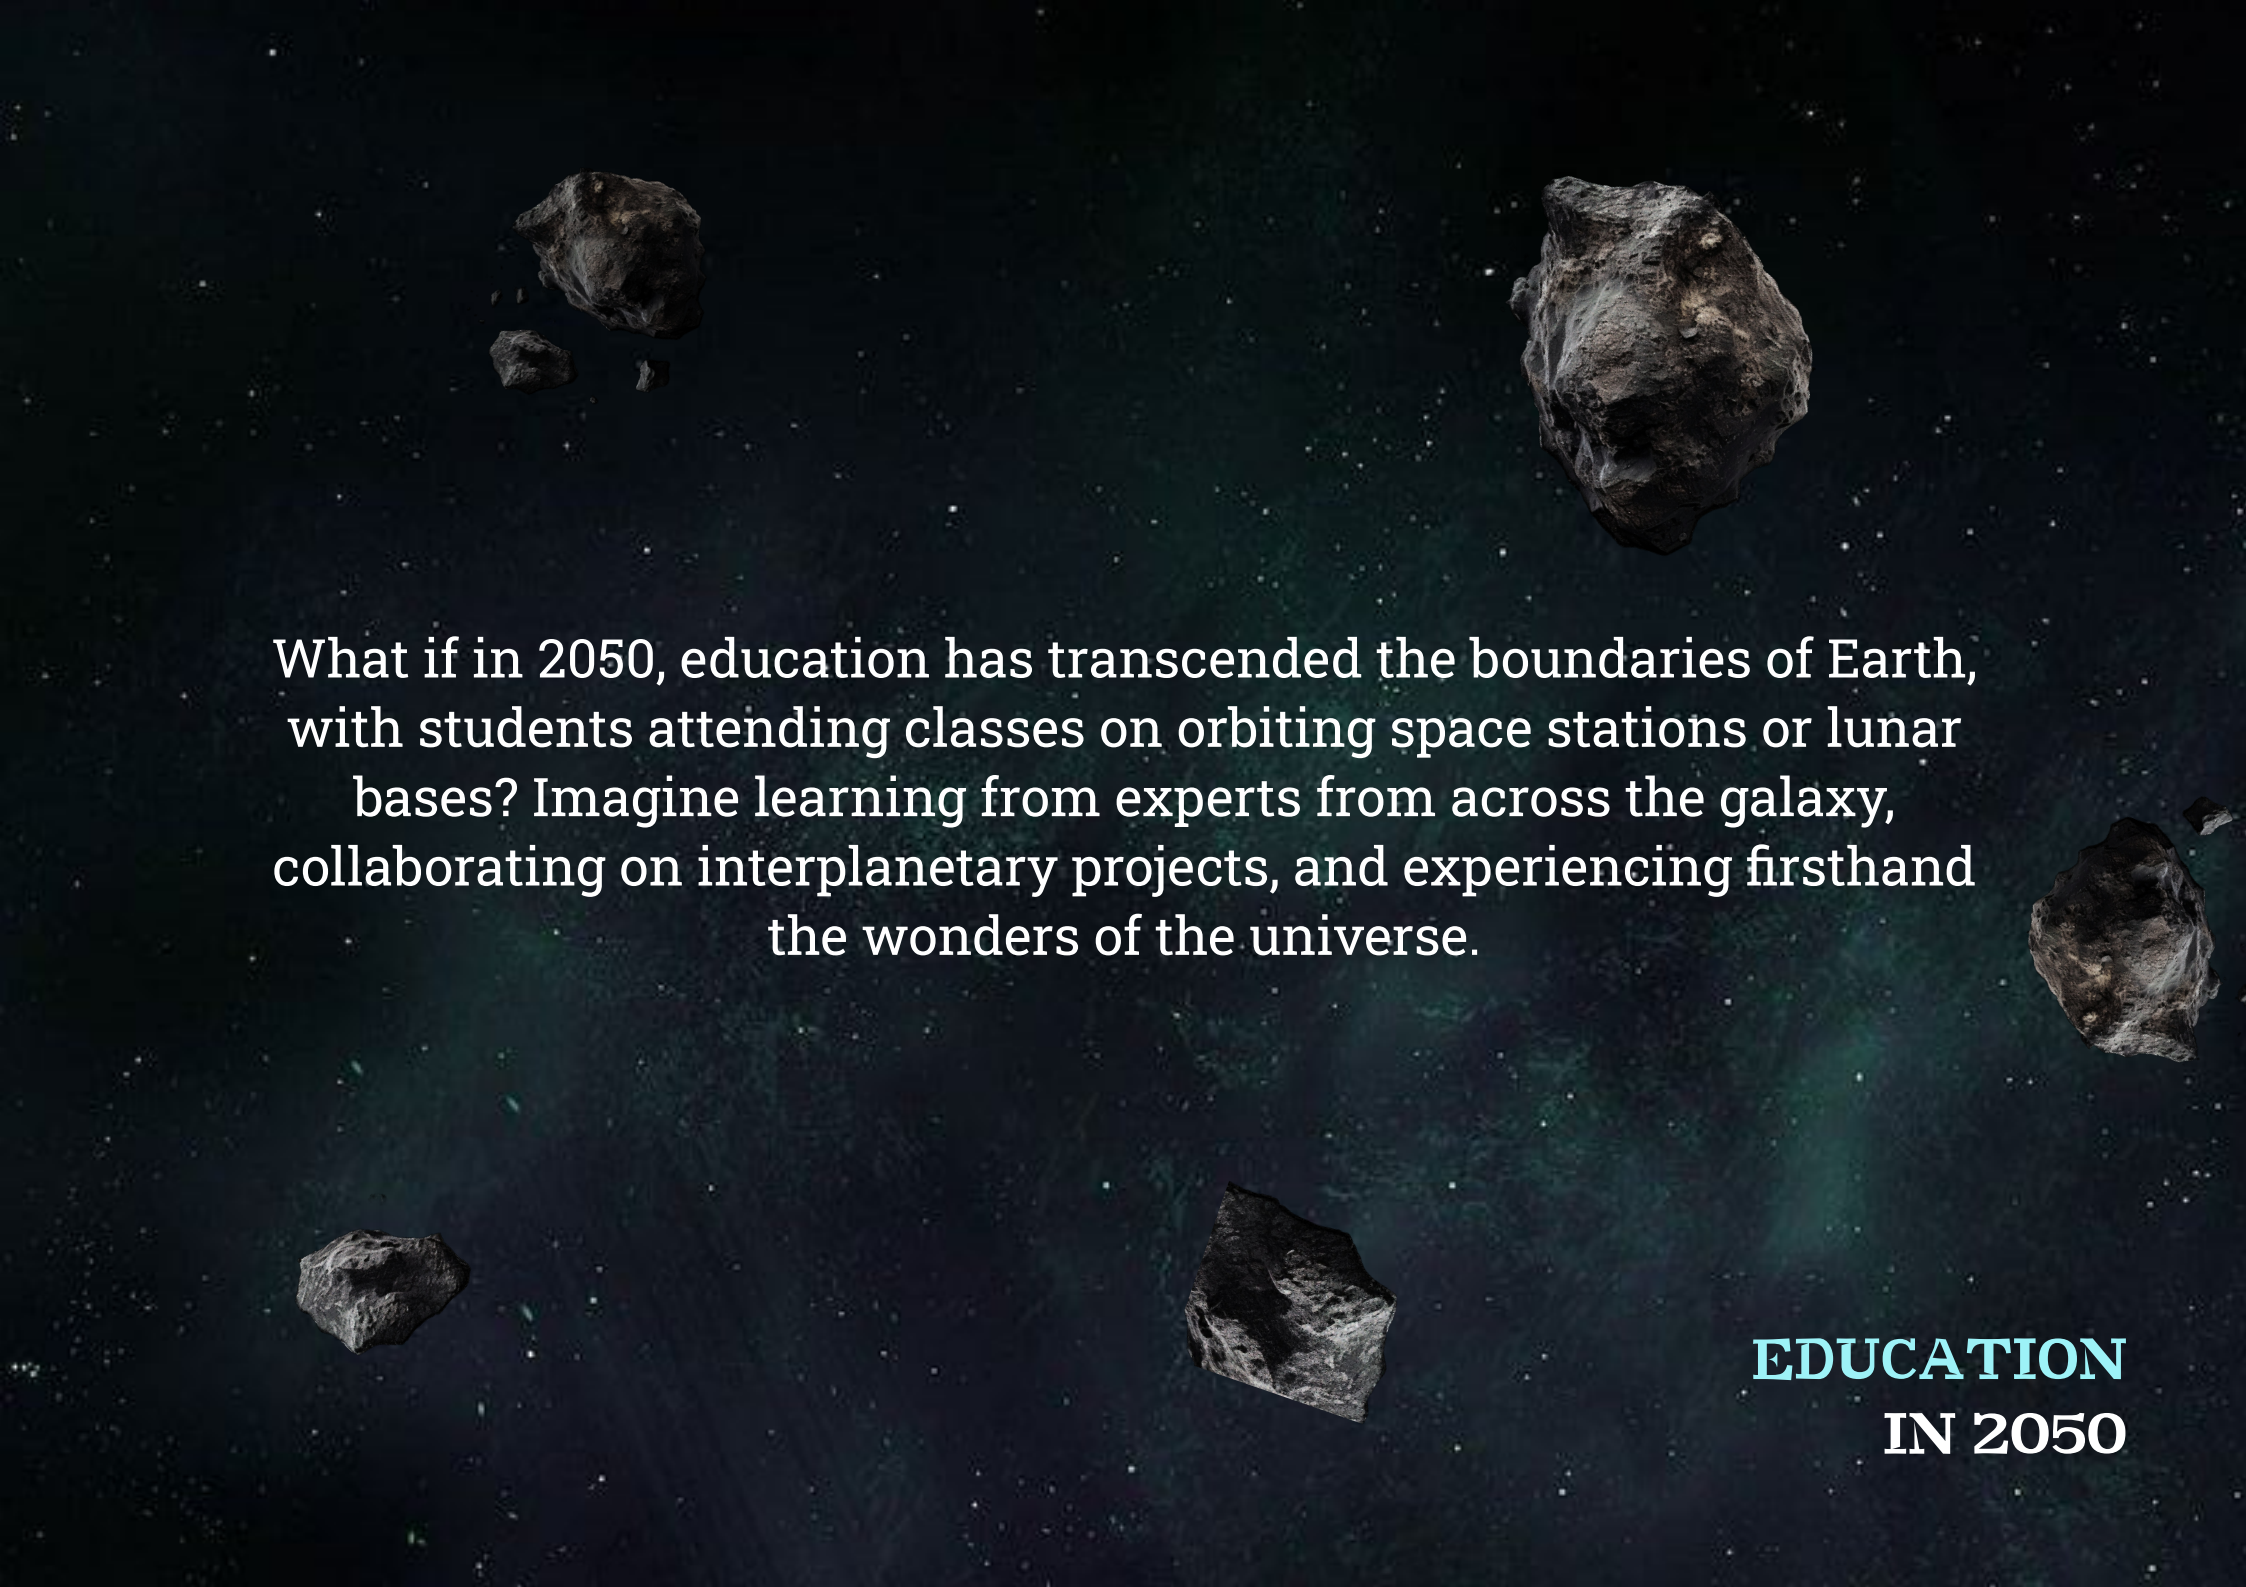

The internship will be all about exploring what hasn't been explored before, travelling deep into space, facing all kinds of different challenges and maybe encountering a new species. Students will do an internship during their university study.

Explore what hasn't been explored before!

EDUCATION IN 2050

What if in 2050, education has transcended the boundaries of Earth, with students attending classes on orbiting space stations or lunar bases? Imagine learning from experts from across the galaxy, collaborating on interplanetary projects, and experiencing firsthand the wonders of the universe.
